Norwalk Concrete Industries is a Midwestern based custom manufacturer of precast concrete products. Capabilities of precast concrete products include engineering design, review and certification, product application advice, structure load analysis and reinforcing design, and specialty structure analysis and design. Concrete precast products are suitable for commercial, industrial, and residential applications including electrical, communication, natural gas, utility, highway, and water or wastewater treatment applications. Norwalk Concrete Industries is designated as a NFCA certified plant and meets ASTM standards.

## NEWS AND EVENTS

NCI was recently featured in Precast Solutions Magazine for our role in the construction project for the 2012 Super Bowl Walk! [Click here](#) to read the article.

## FEATURED PRODUCT

### NSSA CERTIFIED STORM SHELTERS

- FREESTANDING
- TRANSPORTABLE
- NSSA APPROVED DESIGN
- 250 MPH WIND RATED
- CUSTOMIZABLE

## Buildings

Norwalk Concrete Industries provide durability, cost-effectiveness and long lasting security. Easi-Set® Buildings are installed in a day, require no foundation and are relocatable. Easi-Set® Buildings are used for Storage, Pump Buildings, Power Substations, Housing Communications Hardware, Utility Buildings, HazMat Storage, Restrooms (wet and dry), Concession Stands, Classrooms, and many Custom Applications. Where larger buildings are required, Easi-Span® provides clear span sizes up to 40' x 200'.

Easi-Set® originated the concept of a Transportable Precast Concrete Building. For years the Easi-Set® and Easi-Span® Buildings have led the industry as the precast buildings of choice. The patented post-tensioned building system provides even greater weather-tightness and impact resistance for the precast roof and floors.

"We have been extremely pleased with the restroom we purchased from NCI. From beginning to end, NCI provided the answers and support I requested. The quote process was quick and easy. The design process was flexible and accurate. The purchasing process was simple and accommodating. The delivery was on time with no problems. And, the product has exceeded our expectations."

"NCI staff met every demand, and went above and beyond to meet our needs with great customer service. I would recommend their staff and product to others, especially parks and recreation agencies." -Theron Dieckmann

- Equipment Shelters

### WHY CONCRETE?

- Structurally sound and secure
- Installation is quick and easy
- Complete customization
- Cost effective
- Maintenance free
- Extremely low life cycle cost
- Impact and animal proof
- Will not burn
- Carries UL 752 level 4 bullet resistance
- Improved sound barrier
- Stops liquids and vapor
- Protects better than wood or brick
- Buildings can be designed as safe rooms or storm shelters to withstand 250 mph tornado force winds
